# Our educational materials

Handicraft is a tool for acquiring knowledge and awakening the senses. It contributes to enriching communication and expression, as well as enlarging the capacity to see, understand and interpret the world.

Activities with stickers and handicrafts are in the curriculum of many schools and favor development of a wide range of skills.

## Educational stickers and stickers

Playing with stickers is a basic activity that enables children to develop fine psycho motor skills and to work on different capacities and skills such as developing logic, a command of space, learning geometrical shapes, colors and sizes, as well as the capacity to work in a group.

## Material for Art & Craft

Manual activities develop the imagination, creative skills and sensitivity, opening their minds to adapt to change, helping them to be more tolerant and to collaborate more. Art and handicraft are valuable resources for children with difficulties to express themselves through regular channels such as oral or written language.

## Material for school

In this section of the catalogue, you will find a wide range of classroom materials: scissors, book covering material, folders, pens, pencil cases, chalk...

Our products are tested in schools, kindergartens and extracurricular workshops to satisfy the children's needs for development.

# Our educational games

Playing is an innate activity for children. Children play for the fun of playing, but while they are playing, they develop social, emotional and cognitive skills. When playing, children also learn to be grown-ups

By playing, children acquire new knowledge and improve their skills to carry out new tasks.

Playing encourages integral development, favoring:

- The development of the skills needed to increase intelligence
- Acquiring social behavior and handle social skills
- Building their personality
- Acquiring habits
- Promoting values

APLI Kids games are based on the multiple intelligences identified and defined by the American psychologist Howard Gardner in his "Theory of multiple intelligences".

# Special educational stickers in roll

## STICKERS AS A POSITIVE REINFORCEMENT

In addition to educational stickers in geometrical shapes, there are also educational stickers with faces and expressions that can be used to reward children's effort and achievement.

For example, small routines such as putting away toys, doing homework, eating well, not being punished in the classroom, washing their teeth or helping with household tasks, can be learnt and acquired by means of a reward system.

## STICKERS AS A POSITIVE REINFORCEMENT

This type of removable educational stickers facilitates learning by playing, as well as favoring the child's attention and concentration.

In this manner, children learn to think in a logical manner while at the same time develop the first mathematical concepts.

A number table can be created to speed up their work while they are also having a good time.

## PAPER AND CARDBOARD

For these porous materials, the ideal adhesives are white glue, glue sticks and water glue. Solvent-free adhesives, also ideal for school use.

## EVA FOAM AND PLASTIC

To efficiently stick plastics and derived products, the ideal glue is silicone or universal glue, as they are tougher. If you need quick drying, you can also try the super adhesive or a hot glue gun.

## WOOD, LEATHER AND FELT

For wood, you can use the special wood glue, white glue or universal glue (for models) or contact adhesive for strong attachment. For leather or metal, we recommend contact or silicone adhesive. For felt, the best product to use is textile or universal adhesive.
